Midnight – BSIT 3-1

Ayacocho, Kylie Ross

Castro, Aiza Mae

Monroy, Jeff Carl

Pascual, Arzel Fernando

Valerio, Sir Lance

1. As a user who is interested in commissioning artwork, I want to browse a variety of artist portfolios, so that I can find the ideal style that aligns with my artistic concept.
2. As a user interested in commissioning custom artwork, I want to specify my particular requirements and financial limit so that I can receive an artwork that aligns with my preferences without exceeding my budget.
3. As a user who is collaborating with an artist, I want a convenient communication platform so that I can discuss ideas, provide feedback and track the progress of my commission.
4. As a user who is seeking commission artwork, I want to read ratings and reviews of potential artists so that I can decide when choosing an artist to work with.
5. As a user who has completed a project, I want to leave a review and rating for the artist so that I can share my experience with others.
6. As a client who is commissioning artwork, I want to track progress and manage revisions effortlessly so that I can ensure the commissioned artwork meets my expectations.
7. As an artist who relies on genuine clients for my livelihood, I want to verify if my client is real so that I can ensure the authenticity of the commission and protect myself from potential scams or fake transactions.
8. As an artist, who values the integrity of my creations and safeguards my intellectual property rights, I want assurance that my client respects copyright laws and agrees to the terms of use, ensuring that my artwork is protected from unauthorized reproduction or distribution.
9. As a digital artist, who values transparency and financial security, I want access to a detailed transaction history so that I can track payments and commissions, ensuring clarity and accountability in my financial transactions with clients.
10. As an artist, who values efficient communication and timely updates, I want to receive notifications regarding new commission requests & messages from clients so that I can
